NOTICE INVITING BIDS
FOR
DESIGN, DEVELOPMENT, IMPLEMENTATION OF
DOCUMENT MANAGEMENT SYSTEM FOR STUDENT INFORMATION
AND
SCANNING & DIGITISATION WORK

Notice Inviting Bids (NIT) are invited through GEM Bid from reputed, financially sound and experienced Software Agency/Firm/ Service Provider for Design, Development and Implementation of Document Management System for Student Information System and Scanning and Digitization of Records including indexing, Meta Data entry of official records of Shri Ram College of Commerce, Delhi University, Delhi (SRCC).

General Conditions

- i. Bidders are advised to study the GeM Bid document carefully.
- ii. Submission of Bids against this tender shall be deemed to have been done after careful study and examination of the procedures, terms and conditions of the GeM Bid document with full understanding and its implications.
- iii. Shri Ram College of Commerce, Delhi may, at its own discretion, extend the date for submission of Bids, if circumstances so require.
- iv. Only those Software Agency/IT Firm/ Service Provider who fulfill the eligibility criteria are requested to participate in this Tender. Bids submitted by any other bidders will be treated as non-responsive and will not be considered against this Bid.
- v. Shri Ram College of Commerce, Delhi reserves the right to cancel any or all the Bids or annul the Bid process without assigning any reason thereof.
- vi. The Bidders are expected to examine all instructions, forms, terms and conditions, requirements and qualifications in the bid documents. Failure to furnish all the information required as per the Bidding documents or submission of Bid not responsive to the bid document in every respect will be at the Bidder's risk and may result in the rejection of the Bid.
- vii. At any time prior to the deadline for submission of Bids, SRCC, Delhi may, for any reason, whether at its own initiative or in response to a clarification requested by a prospective Bidder, modify the tender document by amendments. Such amendments shall be posted/ uploaded on the GeM portal through corrigendum and shall form an integral part of the Bid document. The relevant clauses of the tender documents shall be treated as amended

accordingly.

- viii. It shall be the sole responsibility of the prospective Bidders to check the GeM portal from time to time for any amendment in the Bid document. In case of failure to get the amendments, if any, SRCC, Delhi shall not be responsible for any negligence on part of the Bidder.

SCOPE OF SERVICES

A. Design, Development and Implementation of Document Management System:

To design and develop a software system that digitizes student database forms. The system will allow scanned handwritten forms to be uploaded, automatically extract text using OCR, and present the data for manual verification and correction. Verified data will be stored in a secured database and can be searched or exported via an intuitive user interface.

Features and Functional Flow

1. User Authentication

- Login screen with username and password authentication.
- Credentials stored securely in the database.
- Successful login redirects to the welcome home page.

2. Welcome Home Page

- Top navigation bar with the following menu options:
 - **Upload Document**
 - **Search Document**
 - **Logout**

3. Upload Document Module

- User scans and uploads a handwritten student admission form.
- Integrated **Open Source OCR Engine** extracts key data from the scanned form (e.g., Name, DOB, Course, etc.).
- Extracted data is displayed on the screen for user verification.
- User can manually correct or input missing information.
- On clicking "Save", data is stored in the **SQL Database/Postgre SQL**
- Original scanned file is stored in a secure **hard disk folder**.

4. Search Document Module

- Search screen with filters such as:
 - **Name**
 - **Admission Number**
 - **Course**
 - **Date Range**
- Data from search results can be exported to an Excel file using **Open XML SDK**.
- Exported files will include only verified records.

Technology Stack

Layer	Technology
Front-End	ASP.NET Core (.NET 8)
Backend/API	ASP.NET Core MVC / Razor Pages
Database	PostgreSQL / SQL Server
OCR Integration	Open Source OCR (e.g., Tesseract)
File Storage	Local Hard Disk
Security	AES Encryption
Data Export	Excel (via Open XML SDK)

Security Compliance

- All uploaded scanned documents and personal data will be encrypted using **AES Encryption** to ensure confidentiality and integrity.
- Role-based access to be implemented (future enhancement).
- Passwords stored using secure hashing.

Deliverables

- Fully functional software meeting all above requirements.
- Installation and deployment instructions.
- User manual/documentation.
- 3-months bug fix/support period after delivery.

B. Scanning & Digitization of Official Records:

Shri Ram College of Commerce (SRCC), Delhi needs to get its official document and record digitized. All essential files from the year as instructed by authority time to time (shall be declared during the continuation of the contract/ till the work completion) to till date need to be digitized to achieve:

- i. Opaque System prone to manipulations, harassment, and extortion.
- ii. High Value and importance of documents.
- iii. Age and decaying of documents.
- iv. Handling of document is difficult because of their sizes and volume.
- v. Delay in issue of duplicate documents.

Advantage of Digitization:

The basis advantages of getting the documents digitize are

- i. Immediate response to queries made department officials and other users.
- ii. Accessing old document without handling/damaging them.

- iii. Overcome storage space shortages.
- iv. Flexible and fast retrieval regardless of archive size.

Document preparation:

- i. Document/Files will be received from the College in counted numbers (or as per actuals provide by the College).
- ii. If require unbinding / Un-stitching of document will be done and followed by fanning of Documents and making them dust free for smooth scanning.
- iii. Straightening will be done to enhance the quality of creased 'dog-eared' documents, if required.

Scanning:

- A setup of Computers of high Storage Capacity and High-Resolution Document Scanner Table top scanner and wide format Scanners will be installed by the successful firm/ service provider in the concerned sections of the College at designated space.
- Secured working space with furniture and un-interrupted power supply will have to be provided by the College.
- The Documents will be received from the concerned section by the authorized representative of the firm.
- The Document will be passed to the Scanner Operator who will receive the documents and start the scanning process.
- The scanner Operator will name the digitized file in the pre-decided file naming format based on document number, type and size.
- After completing the scanning of a batch the scanner operator will commit the batch and hand it over to Quality Control Operator.
- Documents scanned can be rescanned within 24 hours of handing over the documents to the College if any issue or problem is raised in the scanning, after 24 hours of the scanning.
- The images of the documents generated through scanning will be in PDF format, which is generally used standard image format in document imaging.
- If any document is not found to be fit for scanning, it will be noted by the service provider and further action will be taken after discussing with the designated authority/ representative from the College.

Quality Control and Indexing:

De-skewing, aligning and color corrections of all the scanned pages. The scanned batches will automatically appear on the Scan Quality Control workstation. The operator will receive the files along with the batch of scanned documents. At this stage an operator will be required to check and verify the following:

- i. Scan Quality is up-to-the-mark or not. If any discrepancy is found, re-scanning will be done. If the image has some spots or patches, it will be cleaned. Images will be cropped to size, if required.
- ii. The number of documents scanned - should match the number of pages mentioned in the scan batch. If the number of pages scanned, are less and the pages whose image is missing is found in the packet, he will insert the image at the correct place in the batch

by using scan-insert option.

- iii. The sequence of the documents scanned – if it is not correct, he will correct the image sequence electronically.
- iv. After passing the images through Image QC, the image batches will come to Indexing Stage from Scan Quality Control Stations.
 - a. The Document code shall be entered against the entered data and document will be indexed with the soft data.
 - b. The Indexed Document will get linked with the Data entered by the Data Entry Section.
 - c. Once the Scanned Image is Indexed and linked with entered data, final Quality control is done by randomly checking the records. After final data verification accuracy level of 100% shall be ensured.

Post Scanning Activities:

- i. After completion of the digitization process (scanning, QC and indexing) the physical records will be rearranged in the similar condition in which the records were received from the Record Room/ Record Keeper.
- ii. They will be marked with a sign to indicate that they have been scanned.

S. No.	Steps	Description
1	Step I/II	Documents preparation /Pre-scanning Activities
2	Step III	Scanning of Documents
3	Step IV	Quality checking and Post Processing of Images
4	Step V	Profiling of the Documents i.e., grouping the Documents under their respective profile.
5	Step VI	Indexing/Entering of the Meta data
6	Step VII	Meta data QC
7	Step VIII	PDF Generation
8	Step IX	PDF View
9	Step X	PDF conversion
10	Step XI	Setting the attributes of the PDF Documents (Title, Author, Save as, Print, Copy etc)
11	Step XII	Backup and archival
12	Step XIII	Post Scanning activities, Stapling, Rearranging/Refilling & handing over of records.
